

## APPLICATION FOR REVIEW OF RESULTS

### General Information

1. Students may request for a review of their results after it has been released regardless of the grades obtained for the courses(s). However, the application is only applicable to the courses taken in the current semester and the applications must be submitted to the Department which offers the courses, by submitting an application within 3 calendar days of results release. To accommodate special holidays, the application deadline may be slightly adjusted. Students are advised to check for the [stipulated deadline](#) at the Examination Directory.
2. The review will not involve marking an answer script a second time. To do so at this juncture would be out of context with no relative comparison with the rest of the class. The review would only involve checking through the pages of the answer scripts to ensure that all answers were marked and that there were no mistakes in the summation of marks of all the continuous assessments and examinations. If a mistake is discovered, the University reserves the right to make revisions to students' results in accordance with NUS' guidelines and policies.
3. Students with D+/D/F/CU/U grades are encouraged to attend a feedback session with their lecturers to close the learning loop (including going through the examination answer scripts, if appropriate). Such students should initiate an appointment with their lecturers as soon as it is practicable.
4. Undergraduate students who wish to submit an application for review of results and are eligible to participate in the S/U Exercise should assume no change in their results and proceed to declare their S/U option during the declaration exercise period while waiting for the outcome of their result review. In the event of a grade change after the exam review, students should contact their faculty for follow-up.

### Submission of Application Form

5. Application Form for Review of Result is to be submitted at [EduRec](#). **[Academics > Examinations > Review Results Request]**. This is only for programmes which adhere to the [stipulated schedule](#) at the Examination Directory. For students whose faculty have a different Results Review timeline, please check with your faculty for advice.
6. Before submission, you may wish to look through the **User Guide** (available at [Student Portal](#)) to be clear of the submission process.
7. The system will close after the stipulated deadline and the University will not process requests for review after the deadline.
